

GUARDRUNNER™

GOES WHERE NO OTHER BOATS CAN GO

THE MOST VERSATILE, COMPACT CRAFT FOR CSAR, PATROLLING & SURVEILLANCE

The GuardRunner is the perfect choice for professional Law Enforcement and Combat Search And Rescue (CSAR). Designed, developed and built for those who need a compact, strong boat for patrolling, rescue missions or transporting of personnel and equipment.

Can be launched from shore, larger vessels or by helicopter.

Can be used in areas with shallow, rocky, narrow, icy and other difficult-to-reach waters.

Safely board other boats and crafts or transport crew and equipment.

Tow up to 15 meter boats, life rafts or other objects.

Tow oil booms or carry out other environmental protection operations.

Search and rescue along riversides, in flooded areas as well as in swift/white waters.

OTHER KINDS OF OPERATIONS:

- Law enforcement
- Surveillance
- Dive support
- Swift transport of personnel and equipment
- Evacuations and Medevac response
- Navigation Aid Repairs and Maintenance
- Hydrographic Survey Operations

DESIGNED FOR OPERATIONS IN EXTREME CONDITIONS

- Virtually unsinkable with totally six water-tight sections.
- Designed for unbeatable stability.
- Shock resistant hull for safe operations in shallow and rocky waters.
- Quick-cleaning-system of waterjet from aft deck to secure uptime.
- Intergrated work and rescue platform on aft deck – loading possibilities up to 200kg.

GUARDRUNNER™

GOES WHERE NO OTHER BOATS CAN GO

TECHNICAL DATA

Length	3.6 m
Beam	1.5 m
Height	1.2 m
Dry weight*	≤ 375 kg
Draught	0.3 m
Load capacity*	≤ 375 kg
Top Speed	38 knots
Engine	Yamaha four stroke, 85kW
Fuel Capacity	70 l
Range	≤ 100 Nm

*Depending on extra equipment installed.

OPTIONAL EQUIPMENT

- Navigation system/GPS
- Navigation lights
- Flashing blue/red lights
- Search lights
- Compass
- Engine pre-heater
- Shore power charger box
- Extra safety handles for victim/crew

- Quick Loading System

COLORS AND LABELING

There are many colour choices as options. We can customize your Guardrunner with different combinations of colours, labels and logotypes.

Extremely rugged with the drive train installed in a GRP cartridge and a "plug & play" protective, outer Polyethylene hull.

SAFE AT SEA OFFERS YOU NOT ONLY A PRODUCT BUT A TRUE PARTNERSHIP

Our way of working always starts by learning to understand your operational challenges and together identifying your specific needs. The aim is to develop a customized system involving launch-and-recovery solutions, personal equipment, training & operational procedures etc. for law enforcement and combat search-and-rescue.

SAR SYSTEMS

- GuardRunner
- Mobile Rescue Station
- Launch & Recovery Cradles
- Boat Lifts
- Trailers
- Personal Equipment
- Communication Systems
- Training
- Integration of safe operating procedures
