

RESCUERUNNER

SAVES LIVES AT SEA

THE MOST EFFICIENT CLOSE RANGE RESCUE CRAFT IN THE WORLD

The RescueRunner is the perfect choice for professional SAR operators- designed, developed and built for you who need a small, strong and versatile boat for rescue missions, surveillance or transporting of equipment.

UNIQUE CAPABILITIES

Rescue conscious or unconscious persons with just a one man crew with unbeatable ease and speed.

Access areas in shallow, rocky and narrow waters where other boats cannot reach.

Transfer persons and equipment by safe, quick and stable boarding onto other boats.

Tow up to 15 meter boats, life rafts or other objects.

DESIGNED FOR SAFE OPERATIONS IN EXTREME CONDITIONS

- Glass fiber enforced cartridge
- "Plug and play" rugged Polyethylene Hull
- Built-in soft fenders
- Totally six watertight bulkheads/sections
- Integrated Aft Rescue and Loading deck (1,5 m²)
- Quick and safe access to clean the waterjet via hatch
- Water Jet Trim
- Bilge Pump Redundancy Systems

RESCUERUNNER

SAVES LIVES AT SEA

TECHNICAL DATA

Length	3.6 m
Beam	1.5 m
Height	1.2 m
Dry weight	375 kg
Draught	0,3 m
Load capacity	≤ 375 kg
Top Speed	38 knots
Engine	Yamaha four stroke, 110 hp
Fuel Capacity	70 l
Range	≤ 100 Nm

OPTIONAL FUNCTIONS & EQUIPMENT

- Navigation system/GPS
- Navigation lights
- Flashing blue lights
- Search lights
- Compass
- Engine heater
- Shore Power Charger Box
- Additional Durable Long Life Battery
- Extra Safety Handles for victim/crew
